ACTIVITY

Day 1 — Four Jobs Every Computer Does

Which Job Is It?

Name: _____ Date: _____

Each row is one thing that happens with a computer. Circle the job it shows: input, processing, output or storage.

How do you earn points? 1 point for each row with the right job and a reason, and 2 points for the last question.

Sort each action

Circle one job in each row. Then write why in the last box.

#	What happens	Circle one	Why? Write 1 short sentence.
1	Liam types his password on the keyboard.	**Input** **Processing** **Output** **Storage**	
2	The printer prints Ava's science report.	**Input** **Processing** **Output** **Storage**	
3	A game adds 10 points to the score.	**Input** **Processing** **Output** **Storage**	
4	Diego saves his drawing, so he can finish it tomorrow.	**Input** **Processing** **Output** **Storage**	
5	A smart speaker hears someone ask about the weather.	**Input** **Processing** **Output** **Storage**	

#	What happens	Circle one	Why? Write 1 short sentence.
6	A map app works out the fastest way to school.	**Input** **Processing** **Output** **Storage**	
7	Headphones play a podcast.	**Input** **Processing** **Output** **Storage**	
8	A tablet keeps a family's photos from last summer.	**Input** **Processing** **Output** **Storage**	

Last question. Pick a device you use every day, like a phone or a game console. Name its input, its output, what it processes and what it stores. Write 2 sentences.
