Who Put Your Information Online?

Exit Ticket

Today you learned to sort what's online about a person by who put it there. Read the situation. Then answer all three questions.

Situation
Keith has never posted anything online. His aunt posts family photos and tags him. His school's website lists him on the soccer roster. The music app he uses keeps a record of every song he plays. Keith says, "I don't have a digital footprint."

1. Keith's school put him on its soccer roster page. Who put that information online?
 - (A) An organization published it, because the school made the page.
 - (B) Keith put it there, because he chose to join the team.
 - (C) A company recorded it quietly while Keith was using the website.
2. Keith searches his name and only finds the roster. What does that show?
 - (A) Nothing else about him is online, so his footprint is small.
 - (B) A search shows some public pages, but not everything about him.
 - (C) The tagged photos were deleted, because they didn't show up in the search.
3. Explain why Keith is wrong, and name who put one of those three things online. Write 1-2 sentences.
