Who Put It There?

How to grade: Give 1 point per card and 1 point for the last question, 7 points in all. A card earns the point when the right answer is circled and the box has a fact from the card that shows it.

Card	Answer	Sample answer	Give the point if
1	You put it there	Justin posted the photo and wrote the caption himself.	Give the point for You put it there and a fact like Justin posted it himself.
2	Someone who knows you put it there	His cousin posted the video and tagged him.	Give the point for Someone who knows you put it there and a fact like his cousin posted it.
3	An organization published it	The school made the winners page.	Give the point for An organization published it and a fact like the school made the page.
4	A company recorded it quietly	The app kept a record, and nobody posted anything.	Give the point for A company recorded it quietly and a fact like the app kept a record.
5	An organization published it	The news site wrote the story and published it.	Give the point for An organization published it and a fact like the news site published the story.
6	Someone who knows you put it there	His neighbor posted the photos of the street.	Give the point for Someone who knows you put it there and a fact like a neighbor posted it.

Last question. How many of the six cards did Justin post himself, and what does that show about a digital footprint? Write 1-2 sentences.

Sample answer: Justin posted only one of the six. That shows other people, organizations and apps can add most of a footprint.

Give the point if the answer says Justin posted only one and that others added the rest.
