BELL RINGER

Day 2 — Java Compiles Before It Runs

Bell Ringer: The Missing Mark

Name: _____ Date: _____

Read what Clayton says and his code. Then answer both questions.

What Clayton says
My band program won't run. I think I forgot a semicolon, and Java gave me an error message.

```
1  System.out.println("Hi!");
2  System.out.println("Band day")
3  System.out.println("At 3");
```

1. Which line do you think Java names in its error message? Write the line number and 1 short sentence on why.

2. How would you fix it? Write 1 line of code.
